

10 Surveys = 159 days at sea

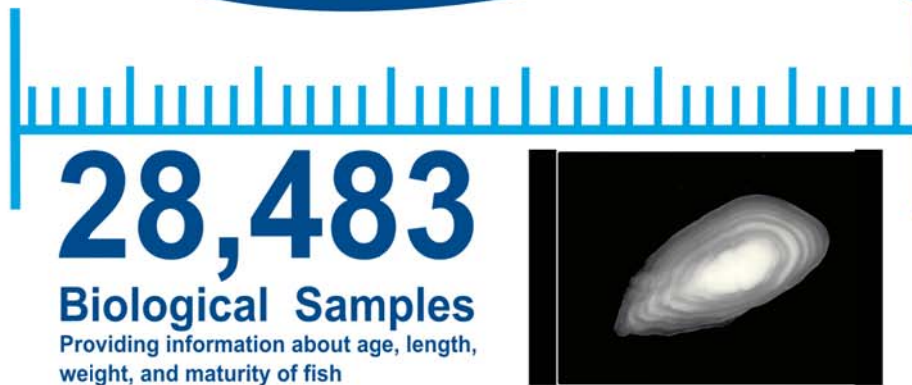

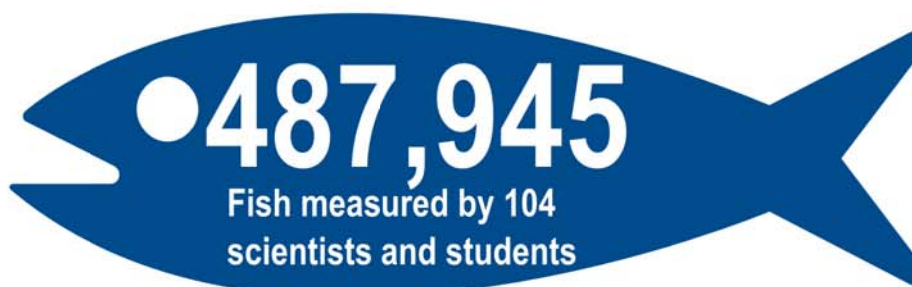

MRV Scotia Performs many jobs throughout the year. This infographic tells about the fisheries surveys carried out in 2015. Recently, fully electronic measuring boards and databases were installed allowing better data processing and instant quality checks to be performed. This year, the system was refired for better connectivity and configuration of workspaces.

482 Trawling stations

Yellow = Bottom Trawls. Red = Pelagic Trawls

245 Species

Species caught during 2015 with words log-scaled by combined catch weight
